

# Timber beam H20

## ► Timber beam H20 Features

1. standardized production lines, qualified Timber Beam Control Dimension.
2. the flange and web access by means of engagement, improved Timber Beam intensity of the damage.
3. waterproof, treated with preservatives to extend the use of the Timber Beam cycle.

## ► I-timber beam technical parameter

Model number	Permit Maximum bending (KN·M)	Permit Maximum shear (KN)	Weight/M (kg)	Height (mm)	Cross-section inertia moment(cm <sup>4</sup> )
H20	M=5.0	Q=11.0	5.0	200	Ix=4290

## Muliang technology
